

TRAINING eLearning Modules

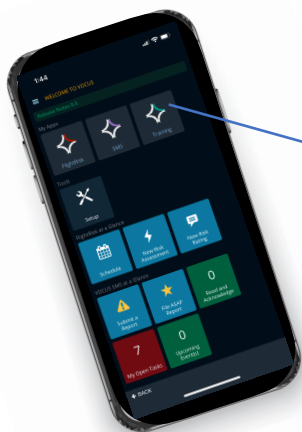

VOCUS eLearning courses that connect the dots between safety theory and the practical application of safety. What's the point of learning something if you aren't taught how to perform its functions in your safety software? Designed exclusively for VOCUS, our safety courses offer a practical approach to understanding the theory while also providing tutorials of the industry's most powerful safety software platform so you can do it!

Learn Safety

Learn VOCUS

Go Beyond Compliance

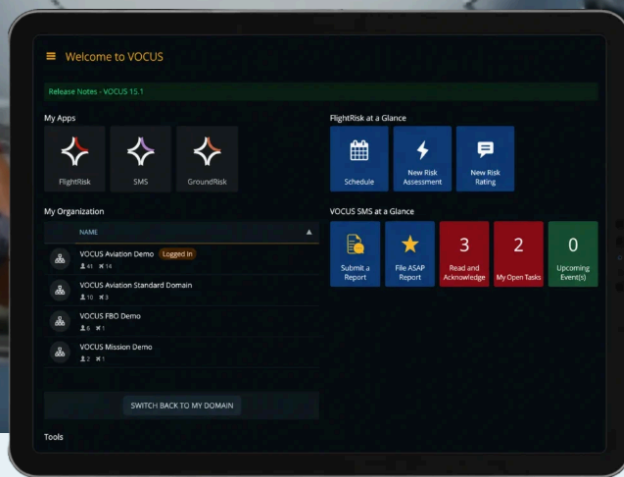

- Courses utilize the latest eLearning technology designed for our mobile lives.
- Complete courses on any device.
- Courses are compliant with ICAO guidelines and satisfy annual safety training requirements.
- Meaningfully and efficiently accomplish annual safety training!

TRAINING

Elevating Safety **Together**

Courses to Train your entire Workforce

SMS Fundamentals: A Practical Approach to Safety

Designed for all frontline employees, SMS Fundamentals guides the learner through a thoughtful and practical safety journey. Employees will learn how to be safety assets as the “eyes and ears” of your flight department.

SMS Advanced: A Course for Safety Leaders

Designed for managers and other interested personnel, SMS Advanced guides the learner through the safety journey from a safety leader’s lens. Managers will learn vital risk management concepts to help improve organizational safety and culture.

ASAP FOR PERSONNEL

This course helps ensure that all employees fully understand ASAP and their rights within the program to help facilitate greater reporting.

ASAP FOR EVENT REVIEW COMMITTEE (ERC) MEMBERS

Provides ERCs with the skills to run an ASAP program while establishing a working relationship with other members of the ERC, giving safety departments the confidence to manage their own ASAP programs.
